Installing insulation over the years hasn't really changed that much.

We are all aware of using the spring wire, then nailing on the staple gun. There are now the so called pressure sensitive adhesive lateral flanges.

(21) Appl. No.: **10/773,872**

But I find still installing insulation is still a very hard and slow moving job, even when staples or nails are no longer needed. Claims 35-2 drawing sheet
